### IN THE WINERY:

2015 was a moderate and warm growing season, something that Cabernet Sauvignon and Petit Verdot do well in. Each variety was hand harvested separately, hand sorted, and fermented with naturally occurring wild yeast. CS was fermented in 5 T fermenters with delestage while the PV was fermented in "The Pig" with punchdowns, then, post-pressing sent to barrels for aging. After 18 months of aging, individual barrels were tasted, assessed and blending to produce the best blend. After bottling, this wine rested in bottle for over 12 months prior to release.
